

Diamondback Energy, Inc. Provides Fourth Quarter 2019 Production Update and Schedules Fourth Quarter 2019 Conference Call for February 19, 2020

January 7, 2020

MIDLAND, Texas, Jan. 07, 2020 (GLOBE NEWSWIRE) -- Diamondback Energy, Inc. (NASDAQ: FANG) ("Diamondback" or the "Company") today announced that its average daily production for the fourth quarter of 2019 was 301.3 MBOE/d (195.0 MBO/d), an increase of 5% from Q3 2019 average daily production of 287.1 MBOE/d and up 65% from Q4 2018 average daily production of 182.8 MBOE/d.

Average daily production for the full year 2019 was 283.0 MBOE/d (187.7 MBO/d), an increase of 27% from combined 2018 average daily volumes of 222.1 MBOE/d, with oil volumes increasing 26% year over year, after adjusting for the full year 2018 impact of the Energen transaction which closed on November 29, 2018.

Viper Energy Partners LP (NASDAQ: VNOM) ("Viper"), a subsidiary of Diamondback, also announced today its fourth quarter 2019 average daily production volumes of 26.1 MBOE/d (16.5 MBO/d), an increase of 23% from Q3 2019 average daily production of 21.3 MBOE/d and up 29% from 20.2 MBOE/d in Q4 2018.

"Diamondback achieved ~5% sequential oil production growth in the fourth quarter of 2019, returning to growth after a dip in the third quarter, and setting the Company up well for our 2020 plan. The impact of offset frac interference experienced in the third quarter subsided in the fourth quarter with field level production in Howard County rebounding as expected. For the full year 2019, Diamondback grew oil production pro forma for the Energen acquisition over 26% year over year," stated Travis Stice, Chief Executive Officer of Diamondback.

Mr. Stice continued, "Following our recent investment grade upgrade and debt refinancing, Diamondback ended 2019 meeting or exceeding every major synergy target laid out with the Energen transaction. With the focus now on 2020, we believe Diamondback is well-positioned to execute on our previously announced plan to deliver 10% - 15% year over year oil growth, while generating robust free cash flow at current commodity prices."
