"Diamondback executed well in the first quarter 2021 and quickly overcame the adversity presented by Winter Storm Uri in February. We closed our two previously announced Guidon and QEP acquisitions in the quarter, and subsequently executed a successful tender offer and refinancing of QEP's senior notes. This refinancing adds \$40 million of annual interest cost savings to the \$60 - \$80 million of previously announced annual cost synergies expected to be extracted from the QEP transaction," stated Travis Stice, Chief Executive Officer of Diamondback.

Mr. Stice continued, "Our updated 2021 guidance announced today reflects our commitment to capital discipline and capital efficiency, as we expect to keep pro forma fourth quarter 2020 production flat in 2021 with about 10% less capital spent than standalone Diamondback in 2020. While commodity prices have improved, global spare oil production capacity remains high as global oil demand recovers from the pandemic. Diamondback continues to see no need to grow oil production into this artificially undersupplied market, and instead plans to generate Free Cash Flow to pay our dividend and pay down debt."
